EDUCATION

Master of Computer Applications
National Institute of Technology, Bhopal · Bhopal, IN · 2025

Bachelor of Science, Electronics (Hons.)
University of Delhi · Delhi, IN · 2020

EXPERIENCE

Low Code Engineer (Contract)   December 2023 – February 2024
ExitHero Inc. San Francisco, CA (Remote)
- Collaborated with the founder and CTO to design a low code solution for client dashboard management, improving client onboarding.
- Engineered and optimized a client dashboard using Notion, Bardeen, Make and Zapier integration, increasing team productivity.
- Successfully delivered a fully functional dashboard, improving client task assignment efficiency by 25%. Enhanced client progress tracking capabilities, resulting in a 15% increase in overall client satisfaction.

PROJECTS

Job Portal – A portal for companies to post jobs ☑   June 2023 – September 2023
Bubble, Material Icon Plugin, Design, API Connector
- Developed a comprehensive job portal that allows companies to post job openings, manage applications, and track recruitment progress. The platform includes features for job seekers to search and apply for jobs, upload resumes.
- Provides companies with tools to post jobs, manage applications, and communicate with candidates.
- Allows users to create profiles, upload resumes, and apply for jobs directly through the portal.

CLC3.tech – Combining Codeforces, Leetcode & Codechef ☑   January 2024 – June 2024
Next.js, Typescript, Python, Docker, EC2, MySQL, Postman, RDS, Github Actions
- More than 60 students use the live website (clc3.tech), with numbers continually increasing. It constantly grabs and updates information like ratings, submissions, and rating changes, etc. from Codechef, Codeforces, and Leetcode to one platform.
- Implemented a token–based verification system to verify coding profile IDs for 10+ users. Utilized Beautiful Soup for web scraping and the API to populate data in a MySQL database, featuring leaderboards and the ability to follow friends.

SKILLS

Languages: C/C++, Typescript, Python, SQL
Web Frameworks: Next.js, Django, Tailwind CSS
Libraries: Zappa, Beautiful Soup, Selenium
Development Tools: Git, Github, Vim, Github Actions
Others: MySQL, AWS, Prisma, Docker, Linux, Notion, Make, Zapier, Bubble, Airtable

ACHIEVEMENTS

- **Smart India Hackathon Grand Finalist.**
- **Ask Notion API GPT** 🔗 used over **1000+** times on **ChatGPT store.**
- **Invited talk** in VIT Bhopal on Notion attended by more than 100 students.
- **500+** Coding problems solved, **Codeforces** 🔗 (Rating: 1316 @princesharma74), **Codechef** 🔗 (Rating: 1700 @princesharma75), **Leetcode** 🔗 (Rating: 1630 @princesharma74)
- **Published 3 research papers in two international journals.** 🔗

ROLES & RESPONSIBILITIES

Notion Template Creator & Campus Leader   May 2023 – Present
Notion Labs Inc. (notion.so)
- Worked with Notion's community team and assisted in nationwide events and collaborated with students globally for community initiatives. Enhanced the Campus Leader onboarding process by volunteering to integrate Notion using its API, Airtable, and Zapier.

President   June 2019 – June 2020
SPIE, International society for Optics and Photonics (spie.org)
- Led SPIE Student Chapter at Univ. of Delhi, boosting membership by 30%, organizing trips, workshops, and speaker events, and expanding global presence. Planned and executed a project exhibition with 20+ projects.
